

*The Siebold Company, Inc.*

**DGM**

## **Color Management Services**

To maximize the efficiency of your press equipment, we offer a complete portfolio of *Color Management Services* by GATF / PIA trained Color Specialists. From pre-press scanning settings through precise plate curve settings, these services help you implement sustainable 'measurable metrics' for consistent color reproduction for single press or multiple press applications. Our evaluation process helps you identify your press-related issues, including dot gain characterization, roller settings, registration, water/ink balance, etc.

- Complete pre-press color training
- Pre-press scan setting training
- Press plate curve settings
- Platemaking measurement training
- Proofing and platemaking analysis
- Press Color measurement training
- SNAP/IFRA Analysis & test forms
- QC Based on precise calibration
